

GOOD NEWS FROM OPTINOVA: WE ARE IN FULL CAPACITY TO SUPPLY!

Greetings from Optinova,

As the world is facing economic hardships because of Covid-19, we have heard and experienced a great number of inspiring stories within our local and global communities. Such solidarity reveals the hidden strength we can garner from working together in a difficult time. As the **#feelgoodfactory**, we have instantly felt the urge to get involved. Exerting our strong global supply network, we have helped governments and hospitals acquire Personal Protective Equipment (PPE) to safeguard front-line health workers and ensure that they can securely continue their heroic work.

Indeed, the desire to wholeheartedly empower our partners' success has been at the very heart of our operations. We have thrived on our commitment to **quality and consistency**, allowing customers to focus on their core business. By adhering to our commitments and maintaining a **continuous dialogue with customers**, we have been able to keep our production line running throughout the global turbulence. The team efforts between Optinova and customers has enabled us to make **capacity available under short notice**.

We wish to see your resilience and solidarity in this unprecedented time and want to assure you that Optinova will be here to help you get back on your feet. We look forward to discussing with you at full speed again how our advanced medical and industrial tubing solutions as well as 50 years of expertise in extrusion can help your business prosper.
