Optinova Unveils New Production Hall in Thailand Dedicated to Medical Extrusion

Optinova is excited to announce the opening of our second production hall in Thailand.

The new production hall will focus solely on medical extrusions such as PTFE liners, FEP Heat Shrink, and FEP IV tubing for catheters.

The newly built facility includes a 2000-square-meter state-of-the-art cleanroom hall , underscoring Optinova's dedication to meeting the growing needs of our customers for high-quality medical tubing.

“This strategic move is designed to cater to the increasing demand in the medical sector and to reinforce our position as a trusted partner in the global healthcare ecosystem,” says Optinova CEO Rom Mendel.

“The vision for the new building is a space that leverages our deep expertise and innovative technologies to set new standards in the medical tubing market.”

Both the facility, powered by solar cells on the roof, the cleanroom environment, and the new technology platforms placed in the facility are of the latest standards to provide highly reliable tubing in a sustainable way. The facility also boasts contemporary workspace and meeting areas to facilitate collaboration and innovation.

The inauguration ceremony of the new building marks a milestone since the opening of the first Thailand site in the 1990s. The new building is dedicated to Obi Jacobson the founder and major contributor to the success of Scantube and Optinova.

“This facility was constructed on schedule in less than a year, and the first lines are already producing. An amazing achievement by the Optinova Thailand team,” states Korpong Vattavoravet, Optinova Thailand Facility Head, “This is just the beginning.”

At Optinova we are proud to continue our legacy of over 50 years in delivering global excellence and quality in medical tubing solutions.
